

Chaos, Rage & Helplessness ... Brain Wars & The Threat Of All-Out Nuclear War

Chaos, Rage & Helplessness And The **Threat Of Nuclear War!**

Introduction

You are about to be briefed regarding worldwide circumstances that in all likelihood you believe you are already sufficiently familiar with and have accounted for; and about which you've done all you could possibly do to make things turn out right or at least better.

You may well feel that because you pay at least some attention every day to the Morning, Midday and Evening News through whatever device – you may very well consider the only Threats you need to deal with might be the rising cost of a cup of coffee at Starbucks, exactly what time each day you should get on the Interstate in the morning for your commute to work, so you can minimize being stuck in traffic; paying attention to your own and your family's health: i.e., eating right, exercising, being connected to the right kind of health insurance and healthcare, which together help you remain both healthy and confident you can stay healthy; or if you suffer from a condition, healthcare that effectively, helps you to vastly improve, so the condition, whatever it may be, doesn't destroy your longevity or quality of

life, or both; spending a certain amount of time on social media every week, connecting and reconnecting with friends past and present; helping your younger kids stay safe to and from and while at school; helping your older kids apply to the right vocational schools or colleges and for the right scholarships; helping all of them to stay far away from illegal and dangerous, (which these days include sudden and deadly) drug use and alcohol abuse; preserving the relationship you are in, if you're in a good one, or finding the right person to share the rest of your life with; making sure you're with the right bank to maximize your savings interest and get the lowest possible rate for your next mortgage; and twice every four years maximizing the likelihood that you will be voting for the right congressman, local officials and eventually president and vice president.

Most of the items on this list so far, are fairly positive even if not all that easy to navigate. But there are other things that can be concerning, for example: What if someone in the family is suffering from depression, or a terminal illness, or if not terminal a crippling illness; or some kind of addiction; or perhaps one or more parents are sufficiently advanced in age that their time seems to be coming to a close, and that becomes intermittently excruciating. Focusing on doing everything possible to stay in or get a job, better yet a career, that might be not so very easily subject to layoffs or lockdowns; while you're fighting off all of the effects of imminent recession, compounded by inflation reportedly at the highest it has been, in 40 years - with no end in sight despite what politicians may say!

One way or another the above list, although of course, not 100% complete, fairly represents what most middle-class adults are concerned with in the United States. The very wealthy have

their own set of immediate concerns, and the very poor their own apparently unsolvable problems. And the purpose of this briefing is to share with you and

give you a chance to change the fact that you can tend to all of the above and every other imaginable thing like it perfectly, and still have it all completely blown away by people from one government or another whom it has been easy for you and I to describe as “madmen”, as an explanation for their mistakes, when other causes entirely, are really the controlling factor.

Doing the research for over half a century that brought this white paper into existence was not pleasant. But at different times, it has been very fruitful and rewarding and on most occasions doing it has provided a great deal of hope for the future, IF enough people act on it soon enough. I'm hoping you'll accept **this acknowledgement of everything else that's on your mind and on your plate and listen thoughtfully to what follows.** My purpose in sharing it with you is to help you create and/or preserve the life you want to live for as long as you may want to live it.

These Threats, instead, were geopolitical maneuvers and by no means purely defensive.

The argument can be made that in most cases when each Nuclear Threat was made (considering no bombs were ever actually dropped), the desired prevented action by the country that was threatened and complied, was ultimately, a good thing for humanity. But damage, severe damage occurred: lodged in the Brains of all now 8 billion and counting, the world's people.

Nuclear **Threat**-Created Brain Dysfunction

Most people know that in an abusive personal relationship, if one side constantly threatens the other, or perhaps if mutual threats persist long-term between the individuals, that relationship deteriorates.

Our Planet has This Next Year to Right itself or Destroy itself!

The Threats backed by Nuclear arsenals have done precisely that to the people of the Earth: deteriorated our relationships. It turns out that under constant Threat (even behind the scenes, **Unconscious Threat**, which hasn't always been all that unconscious), the Human Brain reacts unconsciously with an increasing Rage or Helplessness reaction ... sometimes both, **one after the other**, before too very long.

A complete explanation of the Brain Physiology that allows this to happen would take longer than we have here.

But briefly, what occurs is that a portion of the Brain (called "**the septum**", which means "dividing membrane [or dividing tissue wall]; not to be confused with an entirely different structure not within the brain, that divides your nose into two halves)," has evolved in mammals, including humans, to interrupt DNA-embedded Brain signals that will **potentially**, at some point, or another cause an Individual to snap into Rage against others). That makes **the septum** in the brain a very, very powerful structure because when it is working properly it is how we keep order both informally and formally amongst ourselves in place. As we will talk about below, the ability to express and act on rage is an inherited DNA characteristic in humans and other mammals. **The septum** in your brain keeps **that rage** under civil control, **or more accurately suppresses it**.

When this **fails**, the results goes by the name, "septal rage." And it is wrenchingly and agonizingly vicious!

So, **when the septum is impaired** (this can happen due to infection, injury, or the flooding effect of cortisol around the septum due to prolonged Stress, whether continuous or intermittent) - incidents of Rage coming from such a person or a group (it can happen to whole groups of people at the same time who are, or believe they are under a common Threat), such Rage incidents become more likely, more vicious, more violent, and more frequent!

This Rage pushes others, around the enraged individual, into Helplessness **OUT OF FEAR OR WHEN THEY CAN FIND NO EFFECTIVE OUTLET FOR THEIR OWN RAGE!**

Examples closer to home include an abusive spouse or parent.

A more public example is when there is a tyrannical head of state. If you've ever seen a newsreel or documentary film depicting Adolf Hitler addressing huge crowds in Germany before and during WW II, it is very unlikely that you would have missed that he is almost always doing it while consumed with Rage.

Those he was addressing either mimicked his Rage or became Helpless in the face of being exposed to it, especially repeatedly.

Long-Term Effects on the Brain

Whether close to home or out in the public arena, each individual or group frequently gripped by Rage typically becomes more and more violently enraged over time.

Our Planet has This Next Year to Right itself or Destroy itself!

To repeat, the more one is under the chemical effects of Stress (cortisol in particular) emanating from Threat, the more this "Rage-Brake or Rage-Controlling or Rage-Retarding Structure," (i.e., the septum) **will** tend to malfunction.

The more severely the septum malfunctions, the more frequently and more violently Rage occurs. In the presence of that Rage ... a simultaneous, completely separate but similarly evolved set of Brain circuits unconsciously pushes those affected by a Rage-Spewing Person or Group into Helplessness when their own Rage finds no target or when they are victims of another Person or Group in a state **of** Rage!

As will be discussed further below, these two circuits, Rage & Helplessness within one person, compete and literally are chemically and electronically "AT WAR" with each other for the control of an Individual's Consciousness and Behavior. More than one "psychiatrically named disease" is just a poor description of the Human Brain's "State Of War"!

The External World Right Now

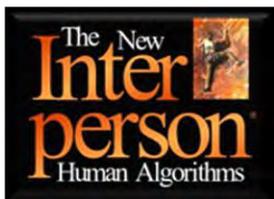

Now, for a moment, let's leave the inside of your Brain and look at "The External World Right Now": Is it not, in every single one of its most severe trouble spots, a twisted mosaic of Violently Rageful Acts by Extreme Leaders most typically perpetrated upon "Helpless" citizens who either sheepishly comply, run away or eventually take on the tyrant's Rage behavior themselves! [Ref: The French Revolutionary Government's "Reign of Terror" in 18th Century France!]

Our Planet has This Next Year to Right itself or Destroy itself!

The kind of Stress-Producing Threat worldwide from Nuclear Weapons and Nuclear Winter referenced here, has now aged to better than 77 continuous years in duration. **How much cortisol flooded into Human Brains in any one life or passed down these last three generations do you suppose that represents?**

Threat causes Stress to a Human Being.

A Huge Breakthrough in Understanding Human Stress

Historically, Stress is the scientifically assigned name for the circumstance in which Demands Exceed Resources, brought about by an identifiable "Stressor". The biological result of such an imbalance have always been (traditionally) called for decades, **"The Stress Response"**.

Before 2018, Neuroscience considered Stress to be the result of a person, place, or thing appearing in the vicinity of the Stressed Individual placing overburdening demands upon them.

But in 2018, a Dutch Neuroscientist made a breakthrough along with his research team: that inherent within Human DNA was **an even more deeply buried** Stress Mechanism.

This Mechanism, he and his team discovered does not require an immediate event in the vicinity of the person under Stress. Instead, it requires only the absence of Obvious Evidence or Signals Of Safety around the person.

It is not too hard to understand that the presence of Nuclear Weapons pointed at one's country does not meet the definition of an **Obvious Signal of Safety**.

Much more dangerous than the kind of Stressor-Driven Stress, science typically identified before 2018, this type, provoked what they called The **Default Innate Stress Response**. And they found it was especially treacherous because it is almost entirely unconscious.

Our Planet has This Next Year to Right itself or Destroy itself!

The 2018, Dutch research, uncovered that The **Default Innate Stress Response** was built into our DNA. Upon the Brain's perception that things are not safe around an individual, The **Default Innate Stress Response** "fuels" electrochemical "voltage changes" in the Brain, to provoke **running and/or fighting and/or hiding behavior, accompanied by a lack of interest in rewards from current activities and recklessness about the way a person behaves.**

It had always been thought before this, that The Stress Response, to be triggered, required a new or repeat appearance of a stressful person, place, thing, or situation in a person's life.

The effect of the ongoing 77-year Threat of more Nuclear Weapons being developed, deployed, and dropped on citizens of different countries in different places of the world (**including** our own) has taken its toll IN **CREATING THE VERY OPPOSITE** of Obvious Evidence or Signals Of Safety.

As these 77 years have unfolded, we see a vast increase in Rage-type Domestic and International events (**wars**, murders, rapes, smash and grab robberies, home invasions, fentanyl murders), with far more people who've been subjected to that Rage acting "apparently and permanently" Helpless!

What is Chaos to a Human Being?

Here are the **9 Triggers** of Human **Rage Leading to Chaos**:

- Extreme Danger to Life & Limb,
- Extreme or **Seemingly Extreme Insult**,
- Extreme Threat or Danger to Family,

- **Extreme** Turmoil in the Environment,
- Extreme Danger to a Mate,
- **Extreme** Disturbances in the Orderly Activity of Day-to-Day Life,
- Extreme or Potentially Extreme Loss of Resources,
- **Extreme** Harm to One's Tribe or
- Being Powerfully Stopped in Pursuit of Survival –

Russia? Ukraine? China? Taiwan? Jan 6th at our Capitol Building, COVID Lockdowns based on Junk Science, Crime Rates Soaring in Every Major City and in rural areas, as well?

Rage & Helplessness fight an ongoing War for **Control**, once enough long-term Stress **e.g.**, from 77 Years of International Nuclear Threat to try and address International CHAOS becomes commonplace because of **septums** damaged by cortisol! – This War has no victors ... and **this War** finds its **Victims** and expresses itself onto the battlefields, in concentration camps, and torture chambers found almost everywhere around the world, operated by all sides. But they only make any Chaos they are thrown at, WORSE!

Our Planet has This Next Year to Right itself or Destroy itself!

The Future If Any

Let's say right here and right now, the future of humanity, short-term, medium-term, and long-term depends entirely on the **Control of Chaos-Triggered Rage & Helplessness** by what we will choose to name ... Advanced Rational Decision

Making™ in the face of what will always be non-stop physical, astro**physical**, meteorological, and political Chaos facing the people of The Earth.

That is where Interperson, Inc. entered the picture.

We are at a point right now on Earth where the term "Nuclear **A**ttack" is being bandied about via the press quoting world leaders of multiple countries threatening each other, including our own.

Our Planet has This Next Year to Right itself or Destroy itself!

The One Solution

The Threat of Nuclear Weapons being used in either direction further unhinges the Rage control mechanisms evolved into our DNA-driven Brains!

And if as an American, you might feel the need to defend the fact that our country couldn't possibly be leading the way with all of this Threat-Leading to-Rage & Helplessness, i.e., threatening others with the possible use of Nuclear Weapons ... If you think ... "It's the the other guys over there, in Asia and Eastern Europe, they are the Inciters", for example ...

I would be most unhappy, but quite accurate to supply you with the specifics regarding the 25 primary times just between 1945 and 1996 that The United States repeatedly used the "Threat" of Nuclear attack to achieve a perceived by our government, "necessary" geopolitical result with another country, whether they were Nuclear-armed, or threatening Us, **or not**.

And we don't know what happened along these same lines between 1997 and now because the documents that would detail those events have not yet been widely declassified.

Converging Cataclysms

Back to the Present ... in 2022, Russia recently threatened the use of Nuclear Weapons against those supporting Ukraine (which includes the U.S.) and Ukraine itself, and we, the United States made a veiled (**possibly "Nuclear"?** counterthreat. Just like all those earlier times, noted above?!

I personally, couldn't be more patriotic or pro-America, but it is important, I believe, to understand that the U.S. has fueled this Catastrophe Boiling Pot as much as anyone. That doesn't make evil actions by foreign tyrants good or OK and doesn't preclude the fact that [our form of government, if practiced as written](#), has produced **THE MOST ENLIGHTENED** form of government that the Rational Decision Making **Capacity Inherent-Within-Our-DNA** has ever produced.

Our Planet has This Next Year to Right itself or Destroy itself!

In none of these theaters of operation up to now, **however** have Rage, Helplessness in the face of Chaos been controlled well, or permanently into the future **by us or anyone**.

To be sure, we are all still here, and we have not blown ourselves up or created climatic conditions so terrible yet that we can't survive. But right now, the chances of all that turning tragically negative in one horrible Cataclysm is staring us in

the face **!Right Now!** Had Chaos-Triggered Rage & Helplessness been well managed by Advanced Rational Decision Making™ **already**, we would not be perched on the brink we are on today.

Nuclear Winter

There is a name for what happens when 100 Nuclear warheads or more are detonated anywhere on Our Planet within a short period of time, notwithstanding where they fall or by whom they are launched.

The result is called "Nuclear Winter," which refers to the blocking out of the sun from the glut of the soot rising from the violent, massive, and persisting ground-level firestorms unleashed after Nuclear detonations, into the stratosphere all around Earth.

Launches by however many nations, within a short period, cause **freezing, unlivable temperatures, the inability to grow food, and the destruction of all civilization**, everywhere, anywhere, no matter who shot first and/or who may or may not have disagreed with it!

Our Planet has This Next Year to Right itself or Destroy itself!

The Brain Science of Rage: Its Consequences in The World ...

Contributing even greater, but invisible Chaos to all of this, each of these three Circuits, Rage, Helplessness & Rational Decision-Making are all **AT WAR WITH EACH OTHER IN EACH AND EVERY ONE OF OUR BRAINS!**

None of the three Circuits naturally, except for profuse human study and research by a **handful of Scientists**, knows or has ever known of the existence of the others in the same way you know where the front door of your house is; except that via rational thought and Unbelievably intense research, this **handful** has learned a great deal about Rage & Helplessness.

Rage & Helplessness Circuits coexist, and interact, but as segments of the Human Brain, **they do not naturally and organically recognize or understand each other's presence and differences, and the fact that they each operate to muscle or elbow out** each other and every other identifiable brain circuit to control the survival of the Organism, to control the survival of you!

They are, quite literally, "at war" with each other.

The incredible value of The **New Human Algorithms™** created at Interperson, Inc., is that we have grabbed ahold of the incomplete understanding of these **3** factors: Chaos, Rage, & Helplessness, **and S**trengthened **The Human Brain's Latent Powers of Advanced Rational Decision Making™ ...**

def. **"Latent"**: existing in unconscious or dormant form but potentially able to achieve expression

... as a result of a full **80 years of combined research** and have brought into existence **a method of ending these DNA-driven Brain Wars™**.

Our Planet has This Next Year to Right itself or Destroy itself!

And the **Physical Wars** from which society endlessly suffers are now poised to destroy us entirely in the end! **Controlling its Brain/DNA origins internally** is the **only way to control it externally!**

This **Internal** Brain War goes on continuously and never stops, and because it is going on, human beings die before they should, notwithstanding the **evolutionary purpose of these circuits was exactly the opposite outcome!**

Our Planet has This Next Year to Right itself or Destroy itself!

In contrast, let's pick **ONE HUMONGOUS CHAOS** right out of the headlines, say, Russia and Ukraine. There's **Chaos** there: Does Ukraine belong to Russia? Should Ukraine rightfully and intelligently become a new member of NATO? Should the Russians consider Ukraine becoming a NATO member a Threat to themselves, an act of war? If you look for "experts" to give you some insight as to which of these or any other perspectives you **might** conceive of, to be the most accurate, you will find the landscape is very **chaotic**, with opinions varied everywhere. **and** Rage and Helplessness are everywhere in Ukraine!

Our Planet has This Next Year to Right itself or Destroy itself!

It was with this awareness in mind that Interperson, Inc began years ago to look **for a way** to overcome the **Chaos**, overcome the **Rage**, and overcome the **Helplessness!**

And we found that **way** in 2006, an algorithm. And called it The TRUST Card[®]. In addition, 6 years earlier Interperson, Inc. began and more recently completed research on an algorithm that was ultimately named "**Instant Compass™**."

Our Planet has This Next Year to Right itself or Destroy itself!

The easiest way to think about it is to imagine that The TRUST Card[®] **has been crafted** to control Chaos, Rage, and Helplessness **INTERNALLY** within one's Brain and **Body** (to **end the Brain Wars™ there**), and **Instant Compass™** is designed to do the very same thing but concerning the Wars in the **EXTERNAL** environment and in one's interactions with others - the ones that could end our species once and for all!

The TRUST Card[®] started as a physical laminated card roughly the size and shape of a large bookmark.

Today, it is also accessible in **Digital** form from at least **18** websites. There will be no faster or more certain way to keep the

Earth from ending itself via Nuclear Winter, which will take out all life on Our Planet within 10 years.

Chaos, Rage & Helplessness
